

Anisley SV.

Web Designer & Developer

Engineer in Information Technology, interested in leveraging my skills as Web Designer. I love helping people and companies to get the most out of technology by creating brand web designs, or teaching the right technical skills to professionals.

Experience

2017 Present Junior web designer
Houston, Texas 77096 United States

Getting a specialization in Web Development. Built my professional portfolio by learning how to use Adobe Creative Cloud, GitHub, Atom, HTML and CSS to design a brand and develop interactive websites from scratch. Comfortable creating and customizing Javascript algorithms.

2016 2017 Shipping coordinator
Costex Tractor Parts, Miami, Florida 33166 US

Working at the Shipping department and collaborating with the Technology Group. Improved the POE Report Process with it's inclusion in the AS-400 system. Reduced daily work efforts of shipping group in 5%. Waiting for an available position to switch departments.

2008 2016 Software engineer, Assistant professor
University of Information Technology, Havana, Cuba

7+ years of experience with adults who need to learn how to use and develop new technologies while meeting deadlines. 10+ courses taught in the area of IT. 2 years leading a team of professors with excellent results in every instructional design assignment.

Education

2008 Bachelor of Science, evaluated by a regionally accredited institution (Josed & Silny). GPA: 3.89

Engineer in Information Technology
University of Information Technology, Havana, Cuba

Graduated with honors, earned the Golden Award for academic achievements. Favorite areas of study: Programming and Database Design. Developed with Java (graduation thesis) a visual management subsystem of an IDE for multimedia products. [Article](#).
